

Dear Iowa State University Graduates and Guests:

Congratulations to all of the Spring 2016 graduates of Iowa State University!

We are very proud of you for the successful completion of your academic programs, and we are pleased to present you with a degree from Iowa State University recognizing this outstanding achievement. We also congratulate and thank everyone who has played a role in the graduates' successful journey through this university, and we are delighted that many of you are here for this ceremony to share in their recognition and celebration.

We have enjoyed having you as students at Iowa State, and we thank you for the many ways you have contributed to our university and community. I wish you the very best as you embark on the next part of your life, and I encourage you to continue your association with Iowa State as part of our worldwide alumni family.

Iowa State University is now in its 158th year as one of the nation's outstanding land-grant universities. We are very proud of the role this university has played in preparing the future leaders of our state, nation and world, and in meeting the needs of our society through excellence in education, research and outreach. As you graduate today, you are now a part of this great tradition, and we look forward to the many contributions you will make.

I hope you enjoy today's commencement ceremony. We wish you all continued success!

Sincerely,

A handwritten signature in black ink that reads "Steven Leath". The signature is written in a cursive, flowing style.

*Steven Leath
President of the University*

THE OFFICIAL UNIVERSITY MACE

The Iowa State University mace symbolizes the authority of the university president. The lead faculty marshal carries it at the head of the academic procession and, by placing it on its stand, signals the beginning of the commencement ceremony.

In medieval times, the mace was a studded, clublike weapon, made of iron. It was capable of breaking armor, and was associated with the protection of kings in France and England.

In the 13th century, it was used for civil purposes and processions. Eventually it became a symbol for academic institutions, an emblem of order and authority in the pageantry.

Created in bronze, silver and tiger maple, the Iowa State University mace incorporates important campus icons such as the campanile located on central campus and the Fountain of Four Seasons, located on the north side of the Memorial Union and features likenesses of four Native American women. The sculptures were created in 1941 by Christian Petersen, sculptor-in-residence from 1934-1955.

The mace's bronze headpiece is an interpretation of the campanile. It includes a silver presidential seal and reflects in a disc representative of the Fountain of the Four Seasons. The words "Iowa State University – Science With Practice" are inscribed on

the edge of the disc. Under the disc is a shortened version or reflection of the campanile headpiece.

The tiger maple staff bears 14 bronze plaques inscribed with the names of all previous Iowa State presidents, their years of service, and a laurel leaf symbolizing the attainment of graduation.

At the staff's base is an unfolding bronze leaf symbolizing the beginning of a new era for graduating students. The overall height of the University mace is 60 inches, and it weighs 14 pounds.

Sculptor Jeanne L. Stevens-Sollman of Bellefonte, Pennsylvania designed and crafted the Iowa State University mace.

Private funds from the ISU Alumni Association's Circle of Former Presidents, Chairs, and Executive Directors, the Stanton Carillon Foundation, and the University Museums made the design and purchase of the Iowa State University mace possible.

THE PRESIDENTIAL CHAIN OF OFFICE

The presidential chain of office symbolizes the rich history and traditions of Iowa State University and is worn by the president at all commencement ceremonies.

It was first worn by President Gregory Geoffroy during the Spring 2008 commencement ceremonies to mark the end of Iowa State University's year-long sesquicentennial celebration.

Created by sculptor Jeanne Stevens-Sollman—the same artist who created Iowa State's mace—the presidential chain of office complements the mace. The two

pieces were commissioned by University Museums and the ISU Alumni Association and are part of University Museums' Art on Campus collection.

The front of the presidential chain of office features an image of the campanile, and Beardshear Hall's east portico (the campus home of the president) is on the back. The shoulder epaulets are the columns of Beardshear and contain the words Leadership and Service. The campanile links in the presidential chain of office contain the words Engagement, Learning, Discovery and Access. The reverse sides of the bronze sections have low bas reliefs of corn. Most pieces in the necklace are bronze. The seal in the center of the campanile and the links in the necklace are sterling silver.

Both the presidential chain of office and the mace are housed in the alumni center and are used at each commencement ceremony.

ACADEMIC REGALIA

In May 2008, as part of its sesquicentennial celebration, Iowa State University debuted custom-designed doctorate regalia.

The special commencement doctorate gowns were created with emblems and colors to reflect Iowa State's tradition and to complement Iowa State's

completes the official regalia.

The ceremony as well as the academic costume at commencement symbolize the record of academic achievement of the various individuals taking part in commencement exercises.

Academic gowns have been part of the university experience since the twelfth century and the advent of the first European universities. Because these early schools were connected to great cathedrals, like those at Bologna and Chartres, the black gown of the schoolmasters, or scholastics, emulated the somber dignity of the clergy and signified a life devoted to learning. In addition, the ample materials of the gown served to keep the scholars warm in the drafty environment of the medieval university. Hoods were also functional, while colors were reserved for masters (or teachers) rather than bachelors (or students). Initially, the colors indicated one's discipline, such as the green of nature for a degree in medicine.

Mortarboards, with black or gold tassels, and school colors came later; but the clerical formality of the academic gown continues to represent the dedication and nobility of the scholar's vocation.

A confusing array of caps, gowns, and hoods emerged from the centuries in Great Britain and from early years of higher education in the United States. American institutions recognized the need for a standard code and the great majority of academic costumes now worn in the United States are in accordance with the general provisions of the Intercollegiate Code of 1895. This code was slightly revised in 1932 and again in 1959. Under this code, the bachelor's gown has pointed sleeves; the master's gown has oblong sleeves with an arc at the bottom; and the doctor's gown has bell-shaped sleeves.

The Code dictates that bachelor's and master's gowns are untrimmed. However, the doctor's gown is faced down the front with velvet and has three bars of velvet across the sleeves. The facing and bars may be black or may be a color pertaining to the discipline. The color of the commencement gown varies in other countries. In America, black is typically the color of choice for bachelor's and master's degrees.

The square shape of the scholar's cap or mortarboard is thought to denote the stability of scholars and their books as suggested in the old poem, "The Ballad of the Cap," first published in 1564. Candidates for advanced degrees wear black tassels. The following is a list of tassel colors for baccalaureate degree candidates:

- Agriculture and Life Sciences – Maize
- Business – Nugget
- Design – Brown
- Engineering – Orange
- Human Sciences – Maroon
- Liberal Arts and Sciences
 - Bachelor of Arts – White
 - Bachelor of Liberal Studies – White
 - Bachelor of Music – Pink
 - Bachelor of Science – Golden Yellow
- Veterinary Medicine – Gray

The hood gives color to the academic costume while its length indicates the wearer's academic degree. At Iowa State, hoods are worn by doctorate degree recipients. Exceptions are made for honorary degree recipients and other officials of the ceremony. In general, hoods are made of a wide panel of black cloth, matching the gown and are lined with satin in the official academic colors of the institution awarding the degree.

Iowa State University's colors are cardinal and gold, therefore the top half of the lining is gold and the lower part is cardinal. The colors used in the edging of hoods and tassels are associated with the discipline. For example, dark blue represents Philosophy and all hoods used in conferring the Doctor of Philosophy degree at Iowa State University are of dark blue edging.

HOODING CEREMONY, DOCTOR OF PHILOSOPHY

The Doctor of Philosophy is the university's highest academic degree, awarded only to those who have successfully completed an intensive and demanding course of study whose primary focus is on learning to conduct original research.

The final stage of the program is the preparation and defense of a dissertation that describes the outcome of a major research project. To prepare for that project, the student must have gained expertise and skills in a particular discipline and must have thoroughly explored its existing knowledge base.

Those who receive doctorates have demonstrated that they are truly experts in their fields whose

research has already contributed significantly to human knowledge.

The hooding ceremony symbolizes their admission to the exclusive ranks of those who have earned the respect associated with the title "Doctor of Philosophy."

During the hooding ceremony, the degree recipients are escorted and hooded by their major professors who have worked with them throughout their study for the doctoral degree. The hoods will connect the graduate with a family of scholars throughout history and from all parts of the world.

ACADEMIC TITLES

The following provides a brief description for the academic titles that appear in this program followed by a list of symbols for each title. Where appropriate, a symbol will be displayed behind the person's name.

Distinguished Professor denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

University Professor denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University.

An endowed chair or professorship provides special recognition to the faculty member to whom the title is awarded. It is held for a specific term, and during that time, endowment earnings are used by the university to supplement departmental support of the faculty member's scholarship and responsibilities in teaching, research, outreach, and service. These chairholders specialize in areas of study identified by the donors who created the endowments.

- ‡ Distinguished Professor
- ‡‡ University Professor
- ◇ Endowed Chair
- ◇◇ Endowed Professorship

SPECIAL RECOGNITION, ADVANCED DEGREES

Candidates for graduation for the Master's or Ph.D. may be recognized with the Teaching Excellence Award or the Research Excellence Award.

The Teaching Excellence Award recognizes those who provided outstanding contributions in teaching undergraduate students while working toward a graduate degree.

The Research Excellence Award recognizes those with outstanding research accomplishments in a graduate program.

Honorees for both awards wear cardinal and gold honor cords and are noted in this program as follows:

- § Research Excellence Award
- †† Teaching Excellence Award

SPECIAL RECOGNITION, UNDERGRADUATE DEGREES

Candidates for undergraduate degrees may be recognized for graduating "With Distinction" and/or graduating in the Honors Program. Levels of special academic achievement are indicated in the commencement program by Latin phrases, also known as Latin honors. This system is recognized internationally, however the requirements vary among institutions. In the United States, Latin honors are most often awarded to those earning undergraduate degrees. Each academic institution sets its own standards and requirements for each honor.

At Iowa State University, candidates for graduation with distinction must have completed 60 semester credits of coursework at ISU at the time they graduate, including a minimum of 50 graded credits. Those graduating summa cum laude (with highest distinction) have earned a grade point average of 3.90 or higher; magna cum laude (with great distinction) have a grade point average of 3.70 to 3.89; or cum laude (with distinction) have a grade point average 3.50 to 3.69. Grade point averages are based on a 4.0 scale. In addition to the notation in the commencement program, this recognition appears on the official transcript and diploma.

The University Honors Program is an individually planned program of study designed to provide greater depth and breadth of scholarship than the regular curriculum. Those graduating from the University Honors Program have designed and completed an individualized program of study, including an independent Honors Research Project, while earning a required minimum grade point average or better.

Students graduating with special recognition will wear a cord and/or medallion and be noted in this program as follows:

- * * * Summa Cum Laude - with highest distinction (cardinal and gold cord)
- * * Magna Cum Laude - with great distinction (gold cord)
- * Cum Laude - with distinction (cardinal cord)
- † Honors Program (medallion)

ADDITIONAL RECOGNITION, UNDERGRADUATE DEGREES

The George Washington Carver Scholarship and Academy is designed for high achieving multicultural students and supports their growth and academic success through specialized curricula and programming. The George Washington Carver Outstanding Achievement Award is granted to those scholars who have demonstrated involvement in a combination of activities such as outstanding community service and successful internships and who are graduating with a 3.5 grade point average or better. These scholars are wearing green stoles.

Iowa State University's Cardinal Key Honor Society, formed in 1926, recognizes students who have achieved the cardinal virtues of leadership, service, scholarship, and character in the university community. Undergraduates must be of junior or senior standing, have earned a minimum cumulative grade point average of 3.0 and be in the top 15% of their academic class. Membership is limited to no more than 1/2 of 1% of the senior class, and 1/3 of 1% of the junior class. These students are wearing two red cords intertwined with a single gold cord.

IOWA STATE UNIVERSITY TRADITIONS

The first swans on Lake LaVerne, Lancelot and Elaine, were a gift from the 1935 VEISHEA Central Committee. From that day on, there has been a pair of swans on Lake LaVerne.

When Iowa State's young football team beat Northwestern University 36 to 0 in 1895, an article in the Chicago Tribune said, "Northwestern might as well have tried to play football with an Iowa cyclone as with the Iowa team it met yesterday." Thus, the "Cyclones" were born. Cy the Cardinal became Iowa State's mascot in 1954.

It is said if you step on the bronze zodiac relief on the floor of the Memorial Union's Gold Star Hall, you will flunk your next test.

In 2003, Iowa State revived a 60-year-old tradition: the Official ISU Ring. Students and alumni worked with the ISU Alumni Association and University Book Store to design a ring that symbolically captures the uniqueness of Iowa State. Rings may only be worn by alumni or by students who have achieved junior or senior status. Rings are officially presented at an annual ring ceremony.

The tradition of "campaniling" states that a student officially becomes an Iowa Stater when he or she is kissed under the university's campanile at the stroke of midnight.

The Fountain of the Four Seasons by artist-in-residence, Christian Petersen (Danish-American, 1885-1961), is located in front of the Memorial Union and was a gift from the 1937 VEISHEA Committee. In 1942, Christian Petersen added four sculptures to represent the four seasons. The east sculpture represents spring with the planting of corn; south - summer, sheltering a young plant; west - fall, holding the harvest; and north - winter, nursing a child. Legend has it that good luck will come to you if you throw a coin in the fountain.

IOWA STATE UNIVERSITY POINTS OF PRIDE

The world's first electronic digital computer was developed at Iowa State University by math and physics professor John V. Atanasoff and engineering graduate student Clifford Berry in the late 1930's. Their invention, the ABC computer, has been called the most important technological innovation of the 20th century.

Iowa State's faculty includes a Nobel Prize winner in chemistry and members of the National Academy of Engineering and the National Academy of Sciences.

Iowa State's faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.

Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.

Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.

Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, music composition, and many more.

With more than 100 majors, 1700 faculty and 800 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.

Every state and more than 100 countries are represented in Iowa State's student body. Iowa State's 600 works of art on campus make its public art collection the largest of any university in the nation.

CHIEF FACULTY MARSHAL AND UNIVERSITY PROFESSOR

Larry Ebbers, Ph.D., School of Education

Larry Ebbers, Chief Faculty Marshal, has been part of Iowa State University's commencement ceremony for 43 years, and he has served as Chief Faculty Marshal for approximately 10 years. He will retire from Iowa State University after the Spring 2016 ceremony, marking 50 years of teaching and service to the university.

Dr. Ebbers is an Iowa State alumnus, earning degrees in Agriculture Education: a B.S. in 1962 and M.S. in 1968.

He began his career as a high school teacher in 1962 and joined Iowa State University in 1965. He earned his Ph.D. in Higher Education in 1972.

Dr. Ebbers has held a number of positions at Iowa State University. He served as Associate Dean of the College of Education (1996-2000), as Director of RISE (1998-2000), as Department Chair of the Professional Studies Department (1985-1992), as Assistant Dean of the College of Education (1972-1985), and as Assistant Director of Residence (1965-1972).

Dr. Ebbers has been the face of ISU's department of Educational Leadership and Policy Studies for decades, serving nationally on college and university advisory boards, the editorial boards of nationally ranked refereed journals, and multiple strategic planning committees. Through his work as co-director of the Community College Leadership Program and director of the Community College Leadership Consortium, and the Leadership in the New Century programs, Dr. Ebbers has played an instrumental role in developing and promoting Iowa's community college system. He championed accessible college education for all individuals.

A University Professor and Professor of Higher Education in the School of Education, Dr. Ebbers has guided and inspired many ISU Ph.D. and Master's students. He is ISU's top producer of Ph.D. graduates, serving as chair or co-chair of more than 190 doctoral committees. He continues to stay in contact with his former students long after they graduate. Dr. Ebbers has actively worked to build alumni networking opportunities and earn awards and recognition for ISU graduates.

His distinguished service to the university also includes serving on the initial group that developed learning communities for Iowa State University. Since their inception, Iowa State's learning communities have become nationally-rated and have served over 62,000 students. Today, Iowa State offers over 80 learning communities, and over 70 percent of first-year students participate.

His many awards include: The College of Human Sciences Diversity Enhancement Award, the ISU Alumni Association's Outstanding Young Alumni Award, the ISU Alumni Association Faculty-Staff Inspiration Award, the ISU Outstanding Achievement Award for Professional Practice and Outreach, ISU's Presidential Service Award, the Ames NAACP's "Making a Difference" Award, the Corly Brooke Learning Communities Advocate Award, the Council for the Study of Community Colleges' Senior Scholar Award and Distinguished Service Award, the NASPA Latino Network "Amigo" Award, and the American Association of Community Colleges National Leadership Award. For his work in student affairs, he was named by NASPA as one of 30 "Living Legacies in the Profession." He was also a Fulbright Scholar in Germany.

The Iowa State community would like to extend its sincere gratitude to Dr. Ebbers for his many devoted years of service and countless contributions.

GRADUATE COLLEGE COMMENCEMENT SPEAKER

Dan Nettleton, Ph.D., Distinguished Professor

Dan Nettleton has been a faculty member in the Department of Statistics at Iowa State University since 2000. He holds the Laurence H. Baker Chair

in Biological Statistics and was awarded the rank of Distinguished Professor in 2015.

Dr. Nettleton has made numerous influential and fundamental contributions to statistics, genomics, bioinformatics, and plant and animal sciences. He often collaborates with

biological scientists, and much of his statistical research is motivated by these collaborations.

He has published more than 150 refereed journal articles and has given 77 invited research presentations at peer universities and at national and international conferences. He has been the Principal Investigator or co-Principal Investigator for 27 research grants totaling \$32.3 million from the National Science Foundation, the National Institutes of Health, and the United States Department of Agriculture. He also conducts research in sports analytics and enjoys participating in sports in his free time.

Dr. Nettleton is actively engaged in graduate education, having served as an adviser or co-adviser for 19 Ph.D. students and 27 M.S. students during his career at Iowa State.

He has earned numerous awards, including College of Liberal Arts and Sciences Outstanding Career Achievement in Research Award, Iowa State University Award for Mid-Career Achievement in Research, Plant Sciences Institute Scholar, and Fellow of the American Statistical Association.

Dr. Nettleton is originally from Algona, Iowa. He earned a BA in mathematics with a minor in computer science from Wartburg College and MS and PhD degrees in statistics from the University of Iowa. He lives in Ames with his wife, Karen, and their three children.

Thesis: Analysis of post-harvest handling of
corn stover and corn

Jeremy David Caplin *Burnsville, Minn.*
B.A. Gustavus Adolphus College
Department: Mechanical Engineering
Major: Mechanical Engineering
Thesis: Utilizing microfluidic technology
to replicate placental functions in a drug
testing model

†† Kelsey Bre Ann Carlson *Moline, Ill.*
B.S. Iowa State University
Department: Animal Science
Major: Meat Science
Thesis: Proteomic features associated with
tenderness of aged pork loins

§ Benjamin Jin Seong Ch'ng *Petaling Jaya, Malaysia*
B.S. Iowa State University
Department: Electrical and Computer
Engineering
Major: Electrical Engineering
Thesis: Development of smartphone-based
spectroscopy instruments for diagnostic
test analysis

Carl Allen Chapman *Ames, Iowa*
B.S. Iowa State University
Department: Computer Science
Major: Computer Science
Thesis: Usage and refactoring studies of
python regular expressions

Umesh Chaudhary *Nepal*
B.S. Northeastern Illinois University
Department: Chemistry
Major: Chemistry
Thesis: Synthesis of high surface area
nanomaterials and their application in
catalysis

Meijie Cheng *Tianjin, China*

COLLEGE OF VETERINARY MEDICINE COMMENCEMENT SPEAKER

Dr. Marcus Kehrli, Director of the USDA-ARS National Animal Disease Center

Dr. Marcus Kehrli is currently the Director of the USDA-ARS National Animal Disease Center in Ames, IA. Dr. Kehrli is a 1982 graduate of the Iowa State University College of Veterinary Medicine and

received his Ph.D. in Immunobiology in 1989. He also received the prestigious Honoris Causa Doctor insignia from the University of Liège given in recognition of over 30 years of research contributions to veterinary medicine. Dr. Kehrli is internationally recognized for his

research in immunology, infectious diseases and genetics, especially in cattle and swine.

Dr. Kehrli's early research focused on delineating the immune dysfunction in cows at calving time that increased their susceptibility to various postpartum diseases such as metritis and mastitis. In 1998 he joined Pfizer's Global Research and Development, Veterinary Medicine Pharmaceutical Discovery Division where, for five years, he led research focused on a pursuit of novel therapeutic solutions for livestock diseases. Dr. Kehrli has spent more than 28 years of his career at the USDA-Agricultural Research Service-National Animal Disease Center in Ames, where he led the Virus and Prion Diseases Research Unit investigating various swine and prion diseases including swine influenza, PRRSV, PCV2, swine bacterial pathogens, chronic wasting disease of deer and elk, scrapie in sheep and BSE in cattle, prior to his current directorship.

He has authored or co-authored over 160 publications in refereed scientific journals and has contributed to several book chapters and monographs. Dr. Kehrli holds four U.S. Patents. Dr. Kehrli pioneered research demonstrating the utility of an immune modulator, G-CSF, given to dairy cows around calving time to reduce the incidence of mastitis. This research led to a new product that over the past two years has been launched globally by Elanco.

He has served as a major or co-major professor, or on the graduate committee of over 20 Ph.D. or M.S. graduate students, and has mentored numerous postdoctoral research associates and foreign visiting scientists. He is a past President of the American Association of Veterinary Immunologists. He has received numerous awards for his scientific discoveries, including the USDA Special Act Award in recognition of outstanding advancements in understanding and eliminating bovine leukocyte adhesion deficiency (BLAD) in Holstein dairy cows; two USDA Technology Transfer Awards; the Pharmacia & Upjohn Physiology Award for outstanding research in dairy cattle physiology and the American Dairy Science Association Fellow Award for distinguished service to the dairy industry. Most recently in 2014, Dr. Kehrli received the Stange Award for Meritorious Service in Veterinary Medicine, which is the highest awarded presented to distinguished alumni in Iowa State University's College of Veterinary Medicine. He also is a devoted and passionate Cyclone.

UNDERGRADUATE COMMENCEMENT SPEAKER

Ernest Moniz, U.S. Secretary of Energy

As United States Secretary of Energy, Dr. Ernest Moniz is tasked with implementing critical Department of Energy missions in support of President Obama's goals of growing the economy,

enhancing security and protecting the environment. This encompasses advancing the President's all-of-the-above energy strategy, maintaining the nuclear deterrent and reducing the nuclear danger, promoting American leadership in science and clean energy technology innovation, cleaning up the legacy of the cold war, and strengthening management and performance.

Prior to his appointment, Dr. Moniz was the Cecil and Ida Green Professor of Physics and Engineering Systems at the Massachusetts Institute of Technology (MIT), where he was a faculty member since 1973. At MIT, he headed the Department of Physics and the Bates Linear Accelerator Center. Most recently, Dr. Moniz served as the founding Director of the MIT Energy Initiative and as Director of the MIT Laboratory for Energy and the Environment where he was a leader of multidisciplinary technology and policy studies on the future of nuclear power, coal, nuclear fuel cycles, natural gas and solar energy in a low-carbon world.

From 1997 until January 2001, Dr. Moniz served as Under Secretary of the Department of Energy. He was responsible for overseeing the Department's science and energy programs, leading a comprehensive review of nuclear weapons stockpile stewardship, and serving as the Secretary's special negotiator for the disposition of Russian nuclear materials. From 1995 to 1997, he served as Associate Director for Science in the Office of Science and Technology Policy in the Executive Office of the President.

In addition to his work at MIT, the White House and the Department of Energy, Dr. Moniz has served on a number of boards of directors and commissions involving science, energy and security. These include President Obama's Council of Advisors on Science and Technology, the Department of Defense Threat Reduction Advisory Committee, and the Blue Ribbon Commission on America's Nuclear Future.

A member of the Council on Foreign Relations, Dr. Moniz is a Fellow of the American Association for the Advancement of Science, the American Academy of Arts and Sciences, the Humboldt Foundation, and the American Physical Society.

Dr. Moniz received a Bachelor of Science degree summa cum laude in Physics from Boston College, a Doctorate in Theoretical Physics from Stanford University, and honorary degrees from the University of Athens, the University of Erlangen-Nuremberg, Michigan State University and Universidad Pontificia de Comillas.

UNDERGRADUATE COMMENCEMENT VOCALIST

AND

F. WENDELL MILLER DISTINGUISHED ARTIST IN RESIDENCE

Simon Estes

Simon Estes is an internationally acclaimed bass-baritone who has performed in the world's major opera houses and in special performances for U.S. presidents and international dignitaries such as

Boris Yeltsin, Yassar Arafat, Yitzhak Rabin, Nelson Mandela, and Archbishop Desmond Tutu. Since 2000, he has been a faculty member at Iowa State University, serving as the F. Wendell Miller Distinguished Artist-in-Residence with the Department of Music and Theatre, sharing

his incredible talents and musical knowledge with students and at numerous activities and events.

Estes rose from humble beginnings in Centerville, Iowa, the son of a coal miner and grandson of a slave, to become one of the world's most accomplished opera singers, paving the way for other African Americans in the classical world. He transferred from Centerville Junior College to the University of Iowa in 1957 and was there until he was accepted in the Juilliard School of Music in 1963. Estes has honorary doctorates from numerous colleges and universities, including one from Iowa State University.

In 1965 Estes made his operatic debut in *Aida* at the Deutsche Opera in Berlin. Among his more than 100 lead operatic roles have been the title role in *The Flying Dutchman* at Bayreuth, being the first male African American to sing a major role on stage there; the role of Porgy in the Metropolitan Opera's first production of Gershwin's *Porgy and Bess*; and the role of Amonasro in *Aida* with Leontyne Price as *Aida* in her "farewell performance" at the Met.

Estes is also internationally known for his humanitarian efforts for children. He established the Simon Estes Educational Foundation, which has awarded more than three million dollars in merit-based college scholarships, and the Simon Estes International Foundation for Children, which provides support for children's health and educational needs. In 2006, he led a group of six Iowa State music faculty members to South Africa to bring music instruction to the students of the Estes school in the Cape Town area. He has performed numerous benefit concerts to help combat HIV/AIDS and eliminate malaria in Africa.

Estes has taught at the Juilliard School of Music, Harvard University, Boston University, and currently is a professor at Iowa State University and at Wartburg College. Among his many awards are the Distinguished Iowa Citizen Award, the Iowan Award, and the prestigious Alumni Award of Iowa State University.

IOWA STATE UNIVERSITY SENIOR CLASS COUNCIL

The mission of the Senior Class Council (SCC), a committee of the Student Alumni Leadership Council (SALC), is to benefit and unite seniors through events and services while promoting an understanding of the Iowa State University Alumni Association. The 2015-2016 Senior Class Council is comprised of 12 students who are dedicated to recognizing seniors for their many achievements.

This year's Senior Class Council has planned a number of programs for seniors including both Fall and Spring Senior Weeks, where seniors enjoy special tours and free food on campus; the Senior Package, a gift set that included commemorative Iowa State items; Grad Breakfast, a chance for seniors to relax and enjoy a meal served by ISU faculty and staff; Real Life Answers, a conference for seniors to prepare them for life after graduation,

and the Senior Send-off, a year-end event for seniors at the ISU Alumni Center to celebrate seniors' transitions to being alumni! The events that SCC plans and co-sponsors are intended to be both beneficial and enjoyable for seniors.

Finally, Senior Class Council always invites you and your families to return to the Iowa State Alumni Center following the Commencement Ceremony today as you are all now Alumni of Iowa State University!

For more information on SCC and SALC programs, please visit www.isusalc.org.

To learn more about the Iowa State University Alumni Association, go to www.isualum.org.
